

## **Not really above his pay grade.**

The shadow cast in 1973 will envelope us all in total darkness. The death knell for our unborn will extend its reach to the rest of us. **Americans elected as their leader a person who expressed no reservations about exterminating his own unborn grandchild so that his daughter would not suffer the punishment of an unwanted baby. The issue was apparently not above his pay grade.** Many words, no substance, and the sheep were mesmerized. But, he was absolutely clear on one issue and so America chose the one who promised the Freedom of Choice Act as his very first mission. Permanent withdrawal of any government protection of Unborn Americans is the new administration goal. His judicial appointments will include this objective! Sinister and scary for those who naively believed that America was still a pro-life nation. It is not! Abortion is legal and his administration will ensure it becomes permanent.

Obama adamantly refuses Unborn Americans their freedom for life, liberty and their pursuit of happiness. He is staunchly pro-abortion and is no different than the one who commits the act, the abortionist. His “common ground” will not save lives! The abortionist’s common ground is the dumpster or medical experimentation lab. He wants to get beyond this issue, meaning silence the opposition, because the issue will not go away.

What will happen to those who disagree with him, will they begin to disappear?
